PRICE LIST
OF THE
Knox Fruit Farm and Nurseries,
FOR SPRING OF 1869.

WITH increased facilities and favorable season for growing Vines and Plants, we are now enabled to offer to the public a larger and better stock than ever before, and at reduced prices.

The attention of vineyard planters and nurserymen is especially invited to our large stock of Grape Vines, embracing all the improved varieties, of extra fine growth, and at very low prices considering the quality of the stock. All planters are aware that *low prices* alone are no proof of *cheapness*, for poorly grown vines or plants are *dear* at any price. Those who have heretofore planted or handled our stock, will only need to be told that the quality this season is fully up to the standard—the severe drought which so injuriously affected most parts of the country the past summer, having had but little effect here. All who are not familiar with the style of our vines and plants, are invited to come and see them. We solicit early correspondence from those desiring to purchase grape vines, as it is believed a large amount of vineyard planting will be done this spring, and the stock of well grown vines in the country is not so great as in some previous years.

When as many as 500 vines or plants of *any one variety* are ordered, we furnish them at the rate per 1000—less than 500 and as many as 50, at the rate per 100—below 50 and not less than 6, at the rate per dozen—below 6, at the price per single article. This arrangement must be strictly adhered to.

Terms Cash; no departure from this rule, except by special agreement.

Our packing is done in the most careful and thorough manner, for which we charge cost of material.

Our prices, we think, are reasonable. Not “*below*” or “*at cost*” of production; but such as to afford a fair profit, to which we think we are justly entitled. We are not ambitious to give our establishment the reputation of a *low-priced nursery*, but one where a **genuine article of the best quality** can be had, and that will give satisfaction to the purchaser. We *guarantee* our prices to be as *low* as the same *quality* of a *genuine* article can be had any where.

Purchasers will please say whether they wish articles ordered, sent by Express, or otherwise. We will make the best possible arrangement with the forwarders. After shipping and giving notice, as is customary, our responsibility ceases.

When the parties are not known to us, orders must be accompanied by the cash, or a suitable reference. Those who favor us with their orders are requested to send early.

 In no case do we pay Express charges, except by special agreement with the purchaser.

Large planters and dealers furnished on special terms, for which, see our Wholesale Catalogue.

For further information, see our Descriptive and Illustrated Catalogue, which contains much valuable information on Small Fruit culture, and will be sent to all applicants enclosing 10 cents.

**MARTHA—(WHITE CONCORD),
AND BLACK HAWK.**

It is well known that we bought all the stock of these two varieties a few years ago from Mr. Miller, at a high price. If we had forced their propagation by green wood and other detrimental practices, we might have had a large supply of vines to offer. But we preferred to preserve their constitution, and send them out in due time and in good condition, to establish their reputation as the Two BEST NEW GRAPES NOW BEFORE THE PUBLIC.

For full description see Catalogue. We append extract from an article on the Martha in a late number of *Hovey's Magazine*, written by Geo. W. Campbell:

"In its general habit of growth, form and consistence of foliage, vigor, hardiness, productiveness, exemption from disease, and adaptability to all soils and locations where vines will grow, it seems to be Concord 'over again.' It is, however, later in blooming, by five or six days, than the Concord; and was, last season, about ten days *earlier* in ripening. On young vines, the berries and bunches are both smaller than Concord; but the quality is greatly superior, having less pulp, less foxiness, more sweetness, and a much more refined and delicate flavor. I am aware that *quality* is a matter of taste; but in my estimate of the quality of this grape I am not alone; for Mr. Thomas Meehan, the accomplished editor of the Gardeners' Monthly, stated at the meeting of the Ohio Pomological Society at Sandusky, last December, that he thought the Martha *one of the finest grapes he ever tasted*. While I would hardly place it as high in the scale of excellence as this, I certainly regard it as superior to Rebecca, or any white native grape I have ever grown, unless it may be Allen's White Hybrid. But when the vigorous, healthy, *Concord* character of the vine, its early ripening, and other good qualities are considered, I cannot do otherwise than accord the Martha the highest place among our white native grapes; and I have no doubt it will prove not only the most popular, but the most valuable, both for the table and for wine, of any white grape yet introduced to the public; a worthy descendant of its distinguished parent, the Concord, and an honor to its enthusiastic originator."

Our stock of vines of these varieties is undoubtedly much the largest and best in the country, which we offer at the following very low prices:

STRAWBERRIES.

OUR assortment of varieties of this fruit and system of culture, continue to produce most satisfactory results, and our stock of well grown plants is larger than ever before. It will be seen that we have made a large reduction in the price of some of the leading varieties. We could grow and handle Strawberry plants so as to offer them at still lower prices, as is often done; but having had some unpleasant experience in buying low-priced plants, we have resolved never again to have any thing to do with stock offered at a less price than that for which it can be *properly* grown. Our plants are grown with the greatest care, so as to secure a *genuine* article of the best quality, and in filling orders, all the plants are selected and furnished in the best possible condition.

STRAWBERRY PLANTS BY MAIL.

At the price per dozen (when as many as two dozen are ordered) and single hundred, we will send plants by mail, prepaying postage. Larger quantities by express, or otherwise, at the expense of the purchaser.

JUCUNDA—Our No. 700,

Continues to win golden opinions wherever it is fairly tested or exhibited, and is undoubtedly the best Strawberry as yet known in this country, both for market and family use; but its reputation has been damaged in some sections, by the dissemination of a spurious variety called *Jucunda*; hence we again caution purchasers to be sure and get the genuine plants. These we now offer at the following reduced prices. (Persons desiring to plant largely for market purposes, will be furnished special rates on application.)

POT-GROWN STRAWBERRY PLANTS.

We have grown a large quantity of plants in pots of the leading varieties for sale, and our own planting. These plants are growing in favor every where, and undoubtedly are the most economical plants to buy. They cannot be sent by mail. As the demand for these plants is large, early orders are solicited.

STRAWBERRY SEED.

We saved some seed the past season of the following varieties: Jucunda—our No. 700, Fillmore, Triomphe de Gand, Wilson, Kitley's Goliah, Nimrod and Agriculturist, which we will furnish at 50 cents per package. We have packages of each variety, and others of all the varieties mixed. The dissemination of this seed we hope will produce some varieties of rare excellence. We are growing some new Seedlings which are of great promise, and shall continue to grow others every year, but none will be offered to the public until they have been thoroughly tested and proved worthy of confidence.

RASPBERRIES.

OUR stock of Raspberry plants is very complete and of the best quality, which we offer at greatly reduced prices. At a very large expense, we have secured, *true to name*, every variety of any merit, and are able to offer the strongest inducements to planters.

NAOMI.

This promises to become the leading Raspberry of the country—hardy, productive, large, of good color and quality, and the *very best for transportation*. We subjoin the following testimonials, and might add many others :

A committee of the Ohio State Horticultural Society, as the result of a critical examination of this variety, report :

"They were highly pleased with the evidence given of the immense productiveness as well as beauty and excellence of the fruit, and expressed the belief that the firmness of the berries was such as to render it better fitted for transportation than any other variety of equal excellence, while in regard to the hardiness of the plants, the testimony of all who have long known the variety is that no injury has ever been known to result from the winter."

Mr. W. B. Bateham, Secretary of the Ohio State Horticultural Society, after a thorough examination of it and test on his own grounds, says :

"For beauty and excellence of fruit, combined with great productiveness, vigor and hardiness of plant, I know of NO VARIETY THAT EQUALS IT. The fine size, color, flavor and firmness of the berries, must make the variety PRE-EMINENTLY VALUABLE as a market fruit, as well as for amateur use."

Dr. John A. Warder, President of the Ohio State Horticultural Society, after an investigation with the *ad interim* Committee of the Society, says :

"The fruit is large, of good color and quality, and has borne transportation to great distances. The canes, as seen in the neighborhood of Cleveland, appear to have resisted the severity of the previous winter without shelter, and were bearing a full crop of fruit."

We have secured the entire stock of *genuine* plants for sale, with perhaps the exception of one very small lot. All we do not sell at prices annexed, we shall plant on our own grounds, being satisfied that it will pay us better to do so than to sell at any price. We are confident of being able to ship the fruit from our farm to New York, a distance of over four hundred miles, in the best condition :

CURRENTS.

The demand for Currant bushes last spring and fall was unprecedented, and promises to be even greater the present season. It is well known that it is exceedingly difficult to procure varieties *true to name*. After many years of expensive and careful effort, we are now able to offer an immense stock of all desirable kinds, which we guarantee to be *genuine*, and to give satisfaction in all respects.
